PROFILE

My name is Syed Faizaan Ahmad and I have learned frontend web development and started to learn backend development. I am very loyal to my work and also ready to help my team member and good at working with teams. I am very enthusiast in searching new things which can help to other person and public and want to learn new things always.

EXPERIENCE

PROJECT: GUESSING-A-NUMBER-GAME

Frontend Web Development

This is a small game in which you can select maximum number like 10, 100, 1000, etc. then it will generate a random number between 1 to maximum number. After that you have to guess the right number, if you guess the right number then there will different animation every time you win.

Skill Required for this Game: HTML, CSS, JavaScript

PROJECT: SIMON

Frontend Web Development

It is also a game but different and it will help to test how much you will remember the thing. In this game there are 4 different color and color flashes every time as the level increases. You have to remember the flashes color and click the color as sequence as it flashes till at your level. If you win or loss it tells you the point.

Required Skill: HTML, CSS, JavaScript
